SUMMARY

Junior Full-Stack Developer with experience in PHP, Laravel, Vue.js, React, Python, and RESTful APIs. Skilled in developing and maintaining web applications, troubleshooting technical issues, and collaborating in remote development environments.

PROFESSIONAL EXPERIENCE

Junior Developer

RevDojo

01/2026 – 05/2026
Florida, United States

- Diagnosed and resolved full-stack application issues using PHP, Laravel, Vue.js, MySQL, Git, and RESTful APIs.
- Maintained and enhanced Learning Management System (LMS) functionality used by automotive industry clients.
- Investigated user-reported defects, reproduced issues, and implemented solutions to improve platform stability.
- Collaborated with developers to deploy bug fixes, feature enhancements, and production updates through Git-based workflows.
- Assisted with backend API troubleshooting and database-related issue resolution.
- Participated in quality assurance testing to identify and prevent production issues before deployment.

Technical Support Representative

Strikingly

08/2022 – 01/2026
California, United States

- Provided technical support through live chat and email, handling over 80 customer interactions daily.
- Maintained a customer satisfaction rating above 96% while supporting a global customer base.
- Diagnosed and resolved issues involving DNS, SSL certificates, domain configuration, website publishing, and SEO.
- Investigated technical problems, identified root causes, and guided customers through effective solutions.
- Collaborated with engineering teams by escalating and documenting complex platform issues.
- Created troubleshooting documentation that improved consistency and efficiency within support operations.

Freelance programmer

UvoCorp

02/2024 – 09/2024
Ukraine

- Delivered 12+ programming projects involving PHP, Python, C, and C++ while consistently meeting deadlines.
- Developed custom software solutions based on client specifications across multiple technologies and project scopes.
- Built a Linux-style file system simulation in C using pointers, structures, and dynamic memory allocation.
- Developed an academic record management application using C++ and object-oriented programming principles.
- Produced clean, maintainable, and well-documented code to support long-term usability and scalability.
- Collaborated directly with clients to gather requirements, troubleshoot issues, and deliver reliable technical solutions.

EDUCATION

Bachelor of Science in Computer Science

First Asia Institute of Technology and Humanities

09/2022 – 05/2026
Tanauan City,
Batangas

TECHNICAL SKILLS

Programming Languages

- PHP, Python, JavaScript, TypeScript, C, C++

Tools & Platforms

- Git, GitHub, Vite, Postman, npm, Composer, Docker, Firebase

Concepts

- MVC, OOP, CRUD Operations, API Integration, Authentication & Authorization, CI/CD

Frameworks & Libraries

- Laravel, Node.js, Vue.js, React, Bootstrap, Tailwind CSS

Databases & APIs

- MySQL, PostgreSQL, RESTful APIs, JSON, WebSockets

PROJECTS

VertexShop (2026)

Full-Stack E-Commerce Platform

Technologies: Laravel, React.js, MySQL, RESTful APIs, Tailwind CSS, Sanctum, Git

- Engineered a full-stack e-commerce platform featuring secure authentication, product management, shopping cart, and order processing capabilities.
- Developed a responsive customer-facing storefront and administrative dashboard using Vue.js and Tailwind CSS.
- Designed and integrated RESTful APIs to facilitate seamless communication between frontend and backend services.
- Implemented inventory management and order tracking systems to streamline business operations.
- Applied Git-based version control and scalable development practices throughout the project lifecycle.

ErgoVision (2026)

AI-Powered Posture Detection System

Technologies: Python, Laravel, Vue.js, MediaPipe, Sanctum, Random Forest, MySQL, RESTful APIs

- Developed an AI-powered web application capable of detecting posture in real time.
- Integrated machine learning models to analyze posture and provide ergonomic recommendations.
- Built a responsive dashboard using Laravel and Vue.js for user interaction and monitoring.
- Implemented API communication between machine learning services and the web platform.

Snapfolia (2025)

AI Plant Identification Platform

Technologies: Python, Laravel, ReactJS, Mobile Development, Machine Learning, Git

- Co-developed a web and mobile application capable of identifying plant species from leaf images.
- Trained and integrated machine learning models for image classification.
- Managed large-scale image datasets for model training and validation.
- Collaborated using Git-based workflows and participated in application deployment and testing.
